Machine is capable of building wing pallets.

Standard specifications

- **Electrical Requirements**: Machines are wired @ 230 V 3-phase 30 A
- **Air Requirements**: 34 SCFM @120psi
- **Stacker Height**: 14’
- **System Weight**: 12,000 lbs.
- **Nail Size Range**: 1-3/4” to 3-1/4”
- **Nail Capacity**: 3000 count nail coils

We stand behind our products and take care of our customers. When you place a service call, you’ll speak to a technician who knows your Pallet PRO inside and out.

If you’re in the continental United States or Canada, our technicians will visit on-site to aid in the start-up process. We’ll also provide operator and maintenance personnel training.

The Pallet PRO carries a full manufacturer's warranty on all motors, electronics, and pneumatic parts, as well as unlimited phone service to the original machine purchaser for the life of the machine.

**WHY THE Pallet PRO?**

The Pallet PRO is a high capacity, automatic pallet machine that can help you expand into new markets and/or increase your current production.

Durable construction from heavy duty parts will give you years of dependable service. There are Pallet PRO’s that have been in production for over 20 years.

Several customers have been so satisfied with their Pallet Pro that they’ve bought additional machines to increase their output.

Compared to similar machines, you won’t find this volume of production at such a competitive price.

**BENEFITS**

- **PNEUMATICALLY CONTROLLED**
  
  The Pallet PRO is preferred to hydraulic machines because it operates faster, costs less to maintain and has less downtime.

- **ACCESSIBILITY TO PARTS**
  
  Parts on the Pallet PRO are accessible. Adjustments to tools and trigger pressure can be made from the operator’s side.

- **QUICK AIR DISCONNECTS**
  
  The Pallet PRO’s quick disconnects allow individuals to disconnect air lines using their hands instead of always requiring a tool.

- **TROUBLESHOOTING & DIAGNOSTICS**
  
  The Pallet PRO uses a PLC interface for immediate operation feedback. It also allows Rayco technicians to help you diagnose problems over the phone.

**UP TO:**

1200 PALLET per 8hr SHIFT

30 GALLON AIR TANK

Supplies a large volume of air for higher volume production should your air supply be a considerable distance away.

LCD TOUCHSCREEN DISPLAY

The touchscreen display and 5-button keypad makes viewing and entering information about each pallet easier.

70 OR 80 PAL SERIES NAIL TOOLS

These are the standard for pneumatic pallet machines. Top of the line PAL series nail tools can be provided for your Pallet PRO should you choose.
